Company Overview

Elite Pongamia Bioenergy Project Ltd (EPBP), registered under PVT/2016/009412, is a limited liability company incorporated under the Laws of the Republic of Kenya. Headquartered in Kakamega, Kenya (P.O. Box 1392, Kakamega, 50100), EPBP specializes in renewable energy development and is led by its Chief Executive Officer, Mr. Danson Ligare.

EPBP is committed to advancing sustainable energy solutions by developing and supplying biomass fuels (briquettes and black pellets), biofuels (biodiesel), waste-to-energy projects, and solar energy solutions. By leveraging innovation and strategic partnerships, EPBP plays a crucial role in driving the adoption of clean energy across Kenya and beyond.

Vision & Mission

Mission Statement

To develop and deliver sustainable and innovative clean energy solutions that empower communities, protect the environment, and drive socio-economic development across Kenya and the wider region.

Vision Statement

To be a leading producer and supplier of renewable energy technologies, pioneering Africa's transition to clean energy.

Key Market Demographics

- Population Served: Kakamega County, with a population of approximately 1.87 million (2019 Census).
- Energy Access Gap: Over 70% of rural households lack access to clean cooking solutions.
- Primary Energy Sources: Biomass accounts for 68% of Kenya's energy consumption, demonstrating a significant demand for cleaner alternatives.
- Target Sectors: Households, small and medium enterprises (SMEs), and agricultural industries.

Notable Projects

EPBP has successfully implemented several impactful projects, including:

- Production and distribution of briquettes and black pellets as alternative clean fuels.
- Promotion of clean cooking solutions to improve household air quality and reduce reliance on traditional biomass.
- Deployment of solar home systems and photovoltaic (PV) projects for off-grid communities.

Policy and Planning Contributions

EPBP has actively contributed to energy policy formulation and strategic planning, including:

- Development of the County Energy Plan through the Sustainable Energy Technical Assistance (SETA). A Program funded by the EU
- Support for the Kenya National Clean Cooking Transition Strategy.
- Contributions to the County Integrated Development Plans (CIDP) for Kakamega County (First & Second Editions).
- Input in formulating Africa's energy policy under the Africa-Europe Energy Partnership Forum.
- Advocacy for the Sustainable Energy for All (SE4ALL) Initiative in Kakamega County.

Current Leadership and Initiatives

EPBP plays a leadership role in regional clean energy efforts through:

- ▣ Chairing the Kakamega County Renewable Energy Network (KCREN).
- ▣ Hosting the Kakamega e-Cooking Hub to promote electric cooking adoption.
- ▣ Conducting capacity-building programs to enhance awareness of clean energy and climate change mitigation.

Strategic Partnerships

EPBP collaborates with a diverse network of partners to maximize its impact in the renewable energy sector, including:

- ▣ County Government of Kakamega
- ▣ Shamberere National Polytechnic
- ▣ Laser Infrastructure Technology (LITeS)
- ▣ WEREACH
- ▣ InvestInGreen UK
- ▣ African Union Development Agency–NEPAD
- ▣ Accelerate Africa Development (AAD)
- Teams of experts from the USA, Canada, Israel, the UK, and South Africa
- The Kenya National Government – State department of Energy

SWOT Analysis

Strengths

- Strong grassroots community engagement.
- Established networks with stakeholders.
- Deep understanding of local energy needs.
- Strong relationships with government entities.
- Expertise in regulatory and logistical processes.

Opportunities

- Vast market potential due to low energy access.
- Rising energy tariffs drive demand for alternatives.
- Expanding agricultural sector for clean energy use.
- Carbon financing provides funding avenues.
- Government policies favor clean energy growth.
- Increasing corporate support for green initiatives.

Weaknesses

- Limited financial and human resources.
- Underutilized production capacity.
- Limited awareness of clean energy benefits.
- High initial investment costs.
- Inadequate technological infrastructure.

Threats

- Cultural preference for traditional fuels.
- Political instability and corruption.
- Vulnerability to natural disasters.

Organization Structure

A circular inset image showing a close-up of a wind turbine's nacelle and blades, with another turbine visible in the background against a sunset sky. The image is framed by a white circular border.

Future Ambitions

EPBP is committed to becoming a leading clean energy provider in Kenya and beyond. Key focus areas include:

- ▣ Strengthening financial capacity through investment and funding opportunities.
- ▣ Expanding technical expertise and collaboration with international partners.
- ▣ Developing efficient administrative, storage, and distribution systems.
- ▣ Enhancing networking and stakeholder engagement.
- ▣ Deepening community involvement to drive energy transition.
- ▣ Consolidating and scaling existing projects for greater impact.

Conclusion

With a well-defined vision, strategic roadmap, and strong collaborative networks, EPBP is uniquely positioned to revolutionize Kenya's renewable energy sector. By advancing clean energy adoption, fostering innovation, and engaging communities, EPBP is set to play a pivotal role in driving Africa's transition to a sustainable and energy-secure future.
